Opis produktu

PLEASURE TO THE CORE The Fleshlight Turbo Core offers multiple layers of inner stimulation explicitly designed to replicate the earth-shaking sensations of oral sex. Uniquely designed with our patented multiple suspended entry points, each layer will grab hold of you with various textured sensations. As you slide inside, the Turbo Core’s external suspended tips caress you, rubbing its nibs gently across your head and shaft with each and every stroke. With your member fully engulfed, the matching pair of floating inner rings work in unison to achieve a snug yet welcoming grip. Finally, as you drill deeper into its core, prepare yourself for a toe-curling combo of gripping texture and exceptional suction, unlike anything you have felt before.

Complete with a non-anatomical orifice and an exclusive texture, the Fleshlight Turbo Core is about to take you to new levels of sexual satisfaction.

Here's what you'll receive in your Turbo Core package

- Transparent Turbo housing
- core opening
- core texture
- Instructions for use and care
